IDENTIFIERS Alaska; *Census 1980; Oklahoma

ABSTRACT

The American Indian population exceeded 1 million (1,366,676) in 1980, showing an increase of about 574,000 persons or 72% over the decade. The 1980 Census also identified 42,162 Eskimo and 14,205 Aleut who are still highly concentrated in Alaska. The substantially larger count is the result of natural increase and overall improvements in census procedures, including modified enumeration procedures on American Indian reservations and the use of self-identification. Of federal and state reservations, 278 were identified with 192 in the West and 16 in the South. The report further indicates that one-fourth (339,836) of all American Indians lived on reservations, comprising about 49% of the total population on reservations. The narrative part of the report discusses definitions and explanations (race, identified areas); other population characteristics (household, relationship to householder); other area classifications (regions, divisions, states, counties); housing characteristics, comparability of 1980 data; other 1980 census reports relevant to American Indians; and limitations of the data. Twelve tables provide census tabulations for American Indian, Eskimo and Aleut population by state, reservations and Alaska Native villages, housing unit counts; and persons by race. (ERB)

Introduction

GENERAL

This report presents 1980 census counts of the total and American Indian populations for identified American Indian areas which include reservations, tribal trust lands (off reservation), and the historic areas of Oklahoma (excluding urbanized areas). Counts are also shown for the total, American Indian, Eskimo, and Aleut populations in Alaska Native villages and in Alaska Native regional corporations. Summaries are provided for the United States, regions, divisions, and States. The report contains information on the number of occupied housing units (or households) with an American Indian householder or spouse; comparable data are presented for households in Alaska, with an American Indian, Eskimo, or Aleut householder or spouse.

The types of identified American Indian areas and Alaska Native villages recognized in the 1980 census were based on recommendations of the Office of Management and Budget Task Force on Indian Census, consultations with American Indian tribal governments and organizations, and State governments. The 1990 census is the first decennial census to identify all Federal and State American Indian reservations and the other American Indian areas and Alaska Native villages shown in this report. (In the 1980 census, 278 reservations were identified; the 1970 census identified 115.) This is the first 1980 census report to present data on tribal trust lands, the historic areas of Oklahoma (excluding urbanized areas), and Alaska Native regional corporations.

Information on American Indians, Eskimos, and Aleuts was derived from answers to the 1980 census race item. (See the facsimile of item 4 under "Definitions and Explanations.") The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock.

Identified Areas—For the 1980 census, reservations and their boundaries were identified by the Bureau of Indian Affairs (BIA) and State governments. American Indian reservations are areas with boundaries established by treaty, statute, and/or executive or court order. Some American Indian reservations have tribal trust lands in the vicinity of the reservation which are located outside the reservation boundary (off reservation). These lands also were identified by the BIA for the 1980 census.

The identified historic areas of Oklahoma (excluding urbanized areas) consist of the former reservations which had legally established boundaries during the period 1900-1907. These reservations were dissolved during the 2- to 3-year period preceding the statehood of Oklahoma in 1907.

Identified Alaska Native villages constitute tribes, bands, clans, groups, villages, communities, or associations in Alaska which were listed in sections 11 or 16 of the Alaska Native Claims Settlement Act, Public Law 92-203, or which met the requirements of the Act and which the Secretary of Interior determined were, on the 1970 census enumeration date (April 1), composed of 25 or more Alaska Natives.

Alaska Native regional corporations are corporate entities organized "to conduct business for profit," pursuant to the Alaska Native Claims Settlement Act, P.L. 92-903, as amended by P.L. 94-204, and consist of a portion of the State of Alaska composed, as far as practicable, of Alaska Natives with a common heritage and interest.

The statistics for some reservations and Alaska Native villages shown in this report differ from those published in the 1980 Census of Population, *General Population Characteristics*, PC80-1-B, and the 1980 Census of Housing, *General Housing Characteristics*, HC80-1-A. Data in this report for a few reservations, two Alaska Native villages, and two counties in the historic areas of Oklahoma (excluding urbanized areas) include corrections made after the final 1980 census tabulations were completed. In addition, estimates are provided in the report for nine American Indian areas where data were affected by nonsampling errors. (For details concerning the corrections and estimates, see "Limitations of the Data.")

Content of the Tables—The 1980 census counts of the total population and the American Indian, Eskimo, and Aleut populations for the United States and each region, division, and State are presented in table 1. Table 2 shows the American Indian population living on and off reservations or tribal trust lands for the United States, regions, divisions, and States. The 1980 population and housing unit counts for all races and American Indians are presented for reservations and tribal trust lands in table 3. Distributions of the American Indian population on reservations and tribal trust lands by State and county or census area are presented in table 4. Comparable data to the information shown in tables 3 and 4 are provided in table 5 for the historic areas of Oklahoma (excluding urbanized areas) by county and in tables 6 and 7 for Alaska Native villages. Table 8 presents counts of the American Indian, Eskimo, and Aleut populations in Alaska Native villages by Alaska Native regional corporations. Table 9 provides population ranks by reservation for American Indians. Tables 10 through 12 present separate 1980 population ranks for American Indians, Eskimos, and Aleuts in Alaska Native villages.

AMERICAN INDIANS, ESKIMOS, AND ALEUTS IN REGIONS AND STATES

American Indians

The American Indian population exceeded 1 million (1,366,676) in 1980 and showed an increase of about 574,000 persons or 72 percent over the decade. The substantially larger 1980 census count is the result of natural increase and overall improvements in census procedures, including modified enumeration procedures on American Indian reservations and the use of self-identification to obtain the race of respondents in all areas of the country. Also, a preliminary evaluation of the census results suggests that there may have been a greater frequency in 1980 than in 1970 for individuals, especially those of mixed Indian and non-Indian descent, to report their race as American Indian.

In 1980, as in 1970, approximately one-half of the American Indian population lived in the West. In 1980, 27 percent of American Indians lived in the South, 15 percent in the Midwest[1], and 6 percent in the Northeast. The South was the only region to show a noticeable increase in the proportion of American Indians, from 25 percent in 1970 to 27 percent in 1980.

The States with an American Indian population of 100,000 or more in 1980 were California (198,275), Oklahoma (169,292), Arizona (152,498), and New Mexico (107,338). Approximately 46 percent of the American Indian population lived in these four States; 10 other States had a substantial American Indian population (over 25,000) ranging from Oregon (26,591) to North Carolina (84,536). These 10 States were located in each of the four regions.

Of the four States with the largest American Indian population, California registered the largest percent increase during the 1970-1980 decade (more than doubling its population), and it substantially increased its share of the total American Indian population from 11 percent in 1970 to 15 percent in 1980. Oklahoma had the second largest increase in the American Indian population (tables A and 1).

[1]Designated as North Central region until June 1984.

Eskimos and Aleuts

The 1980 census showed that the Eskimo (42,162) and Aleut (14,205) populations were still highly concentrated in Alaska. Eighty-one percent, or 34,144, of the Eskimo and 57 percent, or 8,090, of the Aleuts were in Alaska. The only other States with more than 2,500 Eskimos and Aleuts were California, with 1,734 Eskimos and 1,480 Aleuts, and Washington, with 1,253 Eskimos and 1,365 Aleuts (table 1).

AMERICAN INDIANS, ESKIMOS, AND ALEUTS IN IDENTIFIED AREAS

Slightly more than one-third (37 percent) of the total American Indian, Eskimo, and Aleut population lived in identified areas (American Indian areas and Alaska Native villages) in 1980. (For the definitions of American Indian areas, see "Definitions and Explanations.") Approximately 24 percent of the total American Indian, Eskimo, and Aleut population lived on reservations, 2 percent on tribal trust lands, 8 percent in the historic areas of Oklahoma (excluding urbanized areas), and 3 percent in Alaska Native villages. Considering each group separately, about 36 percent of American Indians, 63 percent of Eskimos, and 34 percent of Aleuts lived in the identified areas (table B).

Since American Indians constituted 96 percent of the total American Indian, Eskimo, and Aleut population, their distribution in identified areas is very similar to the distribution of the total population group. Nationally, about 36

percent of the total American Indian population lived in American Indian areas and Alaska Native villages in 1980 (table B). However, the proportion residing in these identified areas varied substantially by region. The West had the highest proportion (42 percent) of the American Indian population in American Indian areas and Alaska Native villages. Approximately 36 percent of American Indians in the South lived in identified areas, 29 percent in the Midwest, but only 10 percent in the Northeast.

In some States, American Indians were heavily concentrated in American Indian areas—over 70 percent in four States: New Mexico (78 percent), Arizona (75 percent), South Dakota (74 percent), and Oklahoma (72 percent). An additional four States had between 50 and 65 percent of the American Indian population in American Indian areas: North Dakota, Montana, Wyoming, and Mississippi (tables C, 2, and 5).

Identified American Indian Reservations

There were 278 Federal and State reservations identified for the 1980 census. The number of reservations varied greatly by region, ranging from 192 reservations in the West to 16 in the South (table D). The 1980 census showed that one-fourth (339,836) of all American Indians (1,366,676) lived on reservations. The American Indian population on reservations comprised about 49 percent of the total population on reservations (table 3).

The size of the American Indian population living on reservations varied substantially; however, most reservations had less than 1,000 American Indians. Only one reservation—Navajo—had more than 100,000 American Indians. Pine Ridge Reservation was the only other reservation with more than 10,000 American Indians. An additional eight reservations had more than 5,000 American Indians: Blackfeet, Fort Apache, Gila River, Hopi, Papago, Rosebud, San Carlos, and Zuni Pueblo (tables E and 9).

As with the total American Indian population, most of the American Indian reservation population lived in the West (74 percent). Five States had more than 15,000 American Indians living on reservations: Arizona (113,763), New Mexico (61,876), South Dakota (28,468), Montana (24,043), and Washington (16,440).

These States contained 72 percent of all American Indians on reservations (tables F and 3). The following States also had a substantial American Indian population residing on reservations: North Dakota (11,287), Minnesota (9,901), Wisconsin (9,361), California (9,265), Utah (6,868), and New York (6,734) (tables F and 2).

[1]Designated as North Central region until June 1984.

Housing units on reservations numbered 260,394; about 22 percent were vacant and 78 percent (202,744) occupied. In about 40 percent (81,624) of the occupied housing units, the householder or spouse was American Indian (table 3).

Identified Tribal Trust Lands

In 1980, 30,265 American Indians resided on tribal trust lands, representing 2 percent of the total American Indian population. The BIA identified 36 reservations with tribal trust lands and the Minnesota Chippewa Tribal Trust Lands for the 1980 census (tables B and 3).

Navajo Reservation had the largest number of American Indians on tribal trust lands, followed by Cheyenne River Reservation, Turtle Mountain Reservation, and Rosebud Reservation. American Indians comprised about 56 percent of the total population residing on tribal trust lands in 1980 (table 3).

Identified Historic Areas of Oklahoma (Excluding Urbanized Areas)

The historic areas of Oklahoma (excluding urbanized areas) consist of the former reservations which had legally established boundaries during the period 1900-1907.

The American Indian population in the historic areas of Oklahoma (excluding urbanized areas) numbered 116,359 in 1980, representing 9 percent of the total population in the area (tables G and 5). The majority (69 percent) of American Indians in Oklahoma resided within the boundaries of the historic areas (excluding urbanized areas). (Another 3 percent of the American Indian population in Oklahoma resided on Osage Reservation, the only reservation in the State; table G.)

Among the component counties in the historic areas (excluding urbanized areas), the American Indian population as a proportion of the total population was highest in Noble and Adair Counties with 39 and 33 percent, respectively. Over one-fifth of the population in two other counties—Cherokee and Delaware—were American Indian. Cherokee County had the largest number of American Indians—7,984 (table 5).

Table G. **Distribution of the American Indian Population Inside and Outside Identified Areas in Oklahoma: 1980**

ALASKA NATIVES IN ALASKA

State of Alaska

In 1980, the total Alaska Native population living in Alaska numbered 64,103. The counts for each group were 21,869 American Indians, 34,144 Eskimos, and 8,090 Aleuts. Alaska Natives comprised 16 percent of the total population of the State (table 7).

The largest number of Alaska Natives resided in the Bethel Census Area with 9,247, followed by Anchorage Borough with 8,953 and Nome Census Area with 5,174 (table 7). Alaska Natives were more than half of the total population in the following boroughs or census areas: Bethel Census Area, Dillingham Census Area, Kobuk Census Area, Nome Census Area, North Slope Borough, Wade Hampton Census Area, and Yukon-Koyukuk Census Area (table 7).

About 63 percent of the total American Indian, Eskimo, and Aleut population in the State lived on Annette Islands Reserve (the only reservation in Alaska) and in the Alaska Native villages. The proportion living on the reservation and in Alaska Native villages varied substantially by group—41 percent of American Indians, 78 percent of Eskimos, and 58 percent of Aleuts lived in these areas (table H).

Table H. **Distribution of the American Indian, Eskimo, and Aleut Populations Inside and Outside Identified Areas in Alaska: 1980**

(Data are based on 100-percent tabulations and include corrections to 1980 census counts of American Indians and Eskimos made after final tabulations were completed. Identified Alaska Native Villages

Of the 39,301 Alaska Natives living in the 209 Alaska Native villages, Eskimos were the largest group, 28,574, accounting for about 68 percent of the total Alaska Native population. About one-fifth, or 8,023, were American Indians and approximately 12 percent, or 4,704, were Aleuts (table 6).

Of the 209 Alaska Native villages, only 3—Barrow, Bethel, and Kotzebue—had more than 1,000 Alaska Natives. Seven villages which had between 500 and 1,000 Alaska Native residents were Dillingham, Emmonak, Hoonah, Hooper Bay, Mountain Village, Selawik, and Unalakleet (tables I and 6).

In 1980, of the 16,083 housing units in Alaska Native villages, approximately 80 percent were occupied (12,812). About 73 percent of the occupied housing units had a householder or spouse who was American Indian, Eskimo, or Aleut (table 6).

Table I. **Size of Identified Alaska Native Villages by Number of the Total and Alaska Native Populations: 1980**

(For meaning of symbols, see Introduction. For definition of terms, see Definitions and Explanations)

Alaska Native Regional Corporations

Among the 12 regional corporations in Alaska, Calista had the largest number of American Indians, Eskimos, and Aleuts residing in Alaska Native villages with 13,527. Doyon ranked second with 4,475, and N.A.N.A. ranked third with 4,058. Ahtna Regional Corporation had the least number of American Indians, Eskimos, and Aleuts with 284 (table 8).

SYMBOLS USED IN TABLES

- A dash "—" represents zero or a percent which rounds to less than 0.1.
- Three dots "..." mean not applicable.
- A minus sign (—) preceding a figure denotes decrease.

Definitions and Explanations

PRINCIPAL SUBJECTS

Race

Definition—The data on race were derived from answers to question 4, which was asked of all persons. (See the facsimile of the questionnaire item below.)

The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify.

For persons who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used. This is a modification of the 1970 census procedure in which the race of the person's father was used.

The categories "American Indian," "Eskimo," and "Aleut" include persons who classified themselves as such in one of the specific race categories. In addition, persons who did not report themselves in one of the specific race categories, but entered the name of an American Indian tribe or reported entries such as Canadian Indian, French-American Indian, or Spanish-American Indian, were classified as American Indian.

Fill one circle.	○ White ○ Black or Negro ○ Japanese ○ Chinese ○ Filipino ○ Korean ○ Vietnamese ○ Indian (Amer.) *Print tribe* ➔ _____ ○ Asian Indian ○ Hawaiian ○ Guamanian ○ Samoan ○ Eskimo ○ Aleut ○ Other — *Specify*

Race Edit and Allocation—If the race entry was missing on the questionnaire for a member of a household, an answer was assigned in the computer according to the reported entries of race of other household members using specific rules of precedence of household relationship. If race was not reported for anyone in the household (excluding paid employees), the race of a householder in a previously processed household was assigned. This procedure is a variation of the general allocation process; a fuller discussion of general edit and allocation procedures is included in the 1980 Census of Population, *General Population Characteristics*, PC80-1-B, Appendix D, "Accuracy of the Data."

Identified Areas

The identified areas for the 1980 census are (1) Identified American Indian areas, consisting of American Indian reservations, tribal trust lands, and the historic areas of Oklahoma (excluding urbanized areas); and (2) Identified Alaska Native villages.

American Indian areas were identified for the census with the assistance of tribal governments, the Bureau of Indian Affairs (BIA), and State governments. The identification of Alaska Native villages was done with the assistance of the State of Alaska.

Identified American Indian Areas—In this report, the American Indian areas are defined as American Indian reservations, tribal trust lands located outside the reservation boundaries, and the historic areas of Oklahoma (excluding urbanized areas).

Identified American Indian Reservations—American Indian reservations are areas with boundaries established by treaty, statute, and/or executive or court order. There were 278 American Indian reservations, and their boundaries were identified for the 1980 census by the BIA and State governments. The Federal and State reservations are located in 33 States and may cross State, county, minor civil division/census county division, and place boundaries. Three reservation areas are composed of lands that are jointly administered and/or claimed by two reservations—San Felipe/Santa Ana Joint Area, New Mex.; San Felipe/Santo Domingo Joint Area, New Mex.; and Other reservation lands in Montana.[1]

In this report, "On reservations" includes all areas inside reservation boundaries; it excludes tribal trust lands outside the boundaries of reservations (which are shown separately) and all other off-reservation areas. The category "Off reservation or tribal trust lands" as shown in table 2, includes the historic areas of Oklahoma (excluding urbanized areas), Alaska Native villages, and all other areas outside reservation and tribal trust land boundaries. (See the definitions of these areas below.)

Data for 115 American Indian reservations were published in the 1970 census subject report, *American Indians*, PC(2)-1F. However, 1980 data for these reservations may not be comparable to

[1]Includes land in Big Horn County, Mont., identified as belonging to both the Crow and Northern Cheyenne Reservations.

1970 information because of boundary changes, improvements in geographic identification, new enumeration techniques, and other procedural changes made for the 1980 census.

Identified Tribal Trust Lands—Some American Indian reservations have tribal trust lands in the vicinity of the reservation. These areas were identified by the BIA for the 1980 census. The tribal trust lands approximate the tribal trust land boundaries provided by the BIA because the 1980 census boundaries were extended to the nearest physical feature for census purposes. The tribal trust lands identified for the census are located outside the reservation boundary (off reservation) and are usually associated with a specific reservation. There were 36 reservations with tribal trust lands. In addition, there was one tribal trust land area not belonging to one specific reservation—Minnesota Chippewa Tribal Trust Lands—identified for the census. The Minnesota Chippewa Tribal Trust Lands include land of the Minnesota Chippewa Tribes' member bands of Bois Forte, Fond du Lac, Grand Portage, Leech Lake, Mille Lacs, and White Earth.

"On tribal trust lands" includes all areas inside tribal trust lands located off reservation. Tribal trust lands (off reservation) were not identified in previous censuses.

Identified Historic Areas of Oklahoma (Excluding Urbanized Areas)[1]—The historic areas of Oklahoma (excluding urbanized areas) consist of the former reservations which had legally established boundaries during the period 1900-1907. These reservations were dissolved during the 2- to 3-year period preceding the statehood of Oklahoma in 1907. The former reservation boundaries are used for planning purposes by tribes and the Federal government. In the census, the entire area encompassing the former reservations was identified (excluding urbanized areas); individual former reservations were not identified separately. The historic areas of Oklahoma (excluding urbanized areas) were not identified in previous censuses.

[1]The parts inside urbanized areas were approximated in preparation for the 1980 census.

Identified Alaska Native Villages—Alaska Native villages constitute tribes, bands, clans, groups, villages, communities, or associations in Alaska which were listed in sections 11 and 16 of the Alaska Native Claims Settlement Act, Public Law 92-203, or which met the requirements of the act, and which the Secretary of the Interior determined were, on the 1970 census enumeration date (April 1), composed of 25 or more Alaska Natives. This list was reviewed and updated for the Census Bureau by the State of Alaska prior to the 1980 census to identify specifically only those entities that were recognized legally as Alaska Native villages. For the 1980 census, 209 Alaska Native villages were identified.

"Inside Alaska Native villages" includes all areas inside villages and "Outside Alaska Native villages" consists of all areas outside villages, excluding the one reservation in the State, Annette Islands Reserve. Data on Alaska Native villages are not available from previous censuses. Some cities and "unincorporated places" (referred to as "census designated places" in 1980) which were identified in the 1970 census may, however, approximate the 1980 Alaska Native villages but may not have identical boundaries.

Alaska Native Regional Corporations—An Alaska Native regional corporation is a corporate entity organized "to conduct business for profit, pursuant to the Alaska Native Claims Settlement Act, P.L. 92-203, as amended by P.L. 94-204. It consists of a portion of the State of Alaska composed, as far as practicable, of Alaska Natives with a common heritage and common interest. The boundaries of these "regions" have been legally established by the Secretary of the Interior in coordination with Native Alaskans.

The 12 regional corporations geographically include all parts of the State except Annette Islands Reserve. Each regional corporation has a corresponding nonprofit entity. A 13th region was established for Alaska Natives who were not permanent residents and who chose not to enroll in one of the 12 regions; no census data are presented for the 13th region. The Alaska Native regional corporations are not part of the identified areas for the 1980 census. The data for these areas were compiled specifically for this report.

OTHER POPULATION CHARACTERISTICS

Household—A household includes all persons who occupy a housing unit. A housing unit is a house, an apartment, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

Relationship to Householder—Two basic categories of relationship, householder and spouse, are recognized in tables 3, 5, and 6 of this report:

Householder—One person in each household is designated as the "householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member could be designated as the "householder."

Spouse—A person married to and living with a householder. This category includes persons in formal marriages as well as persons in common-law marriages.

In this report, data are presented for households with an "American Indian householder or spouse" and an "American Indian householder." The category "American Indian householder or spouse" includes all households where the householder or spouse is American Indian. "American Indian householder" includes only households where the householder is American Indian regardless of the race of the spouse. In table 6, the data for Alaska are shown for the category "American Indian, Eskimo, or Aleut householder or spouse" which includes all households where the householder or spouse is American Indian, Eskimo, or Aleut, and for the category "American Indian, Eskimo, or Aleut householder"

which includes only households where the householder is American Indian, Eskimo, or Aleut regardless of the race of the spouse.

OTHER AREA CLASSIFICATIONS

Regions—Regions are large groups of States that form the first-order subdivisions of the United States for census purposes. The four regions are the Northeast, Midwest[3], South, and West. The divisions and States included in each region are shown in tables 1 and 2.

Divisions—Divisions are groups of States which are subdivisions of the four regions. There are nine geographic divisions. The States included in each division are shown in tables 1 and 2.

States—The 50 States and the District of Columbia are the constituent units of the United States.

Counties—In most States, the primary divisions are termed counties. In Louisiana, these divisions are known as parishes. In Alaska, which has no counties, the county equivalents are the organized boroughs together with the "census areas" which were developed for general statistical purposes by the State of Alaska and the Census Bureau. In four States (Maryland, Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States.

HOUSING CHARACTERISTICS

Housing Units—A housing unit is a house, an apartment, a group of rooms, or a single room, occupied as separate living quarters or, if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and which have direct access from the outside of the building or through a common hall.

Although the 1980 census data are generally comparable with 1970 census data, certain changes were introduced for 1980. The part of the 1970 housing unit definition that required a unit to have either (1) direct access or (2) complete kitchen facilities was modified. For 1980, the complete kitchen facilities alternative was dropped, and direct access was required of all housing units. In 1970, vacant mobile homes were not counted as housing units. For 1980, they were included in the housing inventory provided they were intended for occupancy on the site where they stood.

Occupied Housing Units—A housing unit is classified as occupied if it is the usual place of residence of the person or group of persons living in it at the time of enumeration, or if the occupants are only temporarily absent; e.g., away on vacation. If all persons staying in the unit at the time of the census have their usual place of residence elsewhere, the unit is classified as vacant. A household includes all persons who occupy a housing unit as their usual place of residence. In this report, by definition, the count of occupied housing units is the same as the count of households.

Vacant Housing Units—A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by persons who have a usual residence elsewhere are also classified as vacant.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usuable floors are in place. Vacant units are excluded if they are open to the elements or if there is positive evidence (such as a sign on the house) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or office.

COMPARABILITY BETWEEN 1980 100-PERCENT AND SAMPLE DATA FOR AMERICAN INDIANS, ESKIMOS, AND ALEUTS

The 1980 census counts of American Indians, Eskimos, and Aleuts shown in this report may differ from comparable figures shown in other 1980 census publications. The data in this report and in PC80-1-B are based on 100-percent tabulations, whereas in subsequent reports, such as those published in PC80-1-C, data are based on a sample. Differences between 100-percent and sample data are a result of additional edit and review procedures performed during the processing of sample questionnaires as well as sampling variability and nonsampling error.

During the processing of the sample questionnaires, a thorough review of write-in entries was performed as well as additional editing to resolve inconsistent or incomplete responses. For instance, a number of persons who marked the "Other" race category supplied a write-in entry (e.g., Aleutian, Cherokee, Navajo) which indicated they belonged in one of the specific race categories. Limited edit and review procedures were performed for entries of this type during the 100-percent processing; however, not all such cases were identified. As part of the sample coding operation, a more thorough review of write-in entries was performed and such responses were reclassified into one of the 14 specific race categories. The impact of this further work varied substantially by racial group and by geographic area, but was generally negligible for most racial groups.

Information now available indicates that since the effects of the additional review and edit were generally limited and rather varied, the 100-percent tabulations are usually the preferable source for statistics on racial groups. In the case of distributions for subjects covered only on a sample basis (e.g., education, labor force status, and income), the sample figures are the only data available and should be used within the context of the sampling variability associated with them.

A comparison of the 100-percent and sample distributions of the American Indian population for identified American Indian areas is presented in table J and for Eskimos and Aleuts for identified Alaska Native villages in table K. As mentioned above, the 100-percent data are usually the best statistics to use for racial groups, including American Indians, Eskimos, and Aleuts in identified American Indian areas and Alaska Native villages. Table J shows that the sample estimate for American Indians was slightly lower than the 100-percent count for the identified areas.

[3]Designated as North Central region until June 1984.

Table J. **Comparison of 1980 Census 100-Percent and Sample Data on the American Indian Population Inside and Outside Identified Areas: 1980**

(Data include corrections to counts of American Indians made after final tabulations were completed. Data include estimates for a few American Indian areas. For estimates and corrections, see Limitations of the Data. For meaning of symbols, see Introduction. For definition of terms, see Definitions and Explanations)

United States Inside and Outside Identified Areas	100-percent data	Sample data	Difference between 100-percent and sample data

Table K. **Comparison of 1980 Census 100-Percent and Sample Data on the Eskimo and Aleut Populations Inside and Outside Identified Alaska Native Villages: 1980**

(Data include corrections to counts of Eskimos made after final tabulations were completed. For meaning of symbols, see Introduction. For definition of terms, see Definitions and Explanations)

United States Inside and Outside Alaska Native Villages	100-percent data	Sample data	Difference between 100-percent and sample data	
			Number	Percent
ESKIMO				
United States	42 162	42 098	-64	-0.2
Inside Alaska Native villages	26 573	26 702	129	0.5
Outside Alaska Native villages	15 588	15 395	-193	-1.2
ALEUT				
United States	14 205	13 715	-490	-3.4
Inside Alaska Native villages	4 704	4 545	-159	-3.4
Outside Alaska Native villages	9 501	9 170	-331	-3.5

The sample estimate was substantially higher than the 100-percent figure for the American Indian population outside identified areas. A preliminary evaluation has shown that the difference between 100-percent and sample figures varied considerably by specific geographic areas (e.g., individual reservations and counties). A fuller explanation of the differences between the 100-percent and sample data on American Indians will be presented in subsequent 1980 census special reports on the American Indian population.

COMPARABILITY OF 1980 WITH 1970 CENSUS DATA

The size of the American Indian population reported in previous decennial censuses has been affected, to a great extent, by the enumeration procedures, methods for collecting the information on race, and differing procedures used in censuses for classifying persons as American Indian. The 1980 census count of 1.4 million American Indians represented a sharp increase of 72 percent over the 1970 population total. This intercensal increase is larger than that which can be attributed to natural increase. A preliminary evaluation of the census results suggests that the following factors also may have contributed to the 1980 population count of American Indians:

1. Improvements in enumeration procedures, especially on reservations, for 1980.

2. The use of self-identification to obtain information on race throughout the country in 1980. (In 1970, race was obtained on the basis of observation by enumerators in rural areas of the country, including most reservations.)

3. The greater frequency in 1980 than in 1970 for individuals, especially those of mixed Indian and non-Indian descent, to report "American Indian" in item 4 on race. This change in reporting of race appears to have occurred to a greater extent in urban areas than in rural areas, particularly reservations.

4. The omission of the word "race" from the 1980 wording in item 4 may have affected reporting in that item. (See the facsimile of the questionnaire item in this section.)

The potential impact of these factors upon the data should be considered in analyzing changes from 1970 to 1980 in the size, distribution, and demographic characteristics of the American Indian population.

Information on Aleuts and Eskimos was collected separately in all States for the first time in 1980. In 1970, these data were only collected in Alaska. Since Eskimos and Aleuts were highly concentrated in Alaska, these changes did not seriously affect the comparability of the 1980 and 1970 data for these groups at the national level.

OTHER 1980 CENSUS REPORTS ON AMERICAN INDIANS, ESKIMOS, AND ALEUTS

Other 1980 census reports showing complete-count census data for American Indian reservations and Alaska Native villages are *General Population Characteristics,* PC80-1-B, and *General Housing Characteristics,* HC80-1-A. The statistics for some reservations and Alaska Native villages shown in this report differ from those published in PC80-1-B and HC80-1-A. The data on reservations and Alaska Native villages in this report include corrections made after the final 1980 census tabulations were completed.[4]

Separate data on American Indians, Eskimos, and Aleuts cross-classified by age, sex, relationship, and marital status were published also in PC80-1-B. The PC80-1-B reports were published for the United States and each State; data are shown for standard consolidated

[4]Data include corrections as of December 1983. For further information, see "Limitations of the Data."

BEST COPY AVAILABLE

statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas (UA's), counties, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations by county, and Alaska Native villages. Comparable housing data were published in HC80-1-A.

Counts of the American Indian, Eskimo, and Aleut populations were published in *Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas*, PHC80-3. Data are shown for the State, SMSA's, counties, selected county subdivisions, and incorporated places.

Social, economic, and housing characteristics for the total American Indian, Eskimo, and Aleut population were published for each State, its counties or comparable areas, and places of 25,000 persons or 12,500 households in *Advance Estimates of Social, Economic, and Housing Characteristics*, PHC80-S2.

Social and economic characteristics such as education, labor force, and income were published separately for American Indians, Eskimos, and Aleuts for the United States and each State in *General Social and Economic Characteristics*, PC80-1-C. Summary characteristics are shown for reservations and Alaska Native villages. These reports also include data for the total American Indian, Eskimo, and Aleut population for States, SCSA's, SMSA's, UA's, counties, and places of 2,500 or more total population. Comparable housing data were published in *Detailed Housing Characteristics*, HC80-1-B.

Statistics on most of the subjects covered in PC80-1-C are presented in greater detail and cross-classified by age and other characteristics for the total American Indian, Eskimo, and Aleut population in *Detailed Population Characteristics*, PC80-1-D. Most subjects are presented for the State and SMSA's of 250,000 or more inhabitants, and a few are shown for central cities of these SMSA's. Information is presented for the total American Indian, Eskimo, and Aleut population in areas with 25,000 or more of the group or where they comprise at least 10 percent of the total population.

Metropolitan Housing Characteristics HC80-2, presents cross-tabulations of housing information for States, SMSA's and their central cities, and other areas with 50,000 or more inhabitants. Data are presented for areas with 10,000 or more total American Indian, Eskimo, and Aleut population.

Statistics for most of the population and housing subjects included in the 1980 census were published in *Census Tracts*, PHC80-2. Counts are shown separately for American Indians, Eskimos, and Aleuts for SCSA's, SMSA's, and tracts. Social, economic, and housing data on the total American Indian, Eskimo, and Aleut population are published for SCSA's, SMSA's, and tracts with 400 or more of this group.

Counts and characteristics on age, sex, family type, education, labor force status, income and poverty, and housing for the total American Indian, Eskimo, and Aleut population were published for congressional districts for each State and the District of Columbia in *Congressional Districts of the 98th Congress*, PHC80-4.

Data on the American Indian, Eskimo, and Aleut populations were published in various reports in the 1980 Census of Population Supplementary Report series. The specific reports in this series that show data on the American Indian, Eskimo, and Aleut populations are: *Age, Sex, Race, and Spanish Origin of the Population by Regions, Divisions, and States: 1980*, PC80-S1-1; *Race of the Population by States: 1980*, PC80-S1-3; *Standard Metropolitan Statistical Areas and Standard Consolidated Statistical Areas: 1980*, PC80-S1-5; and *Detailed Occupation and Years of School Completed by Age, for the Civilian Labor Force by Sex, Race, and Spanish Origin: 1980*, PC80-S1-8. PC80-S1-3 shows separate data for American Indians, Eskimos, and Aleuts; the others provide data only for the total American Indian, Eskimo, and Aleut population.

Future 1980 census reports showing data on the American Indian, Eskimo, and Aleut populations will be in Population Subject Reports, PC80-2, including two separate reports on the American Indian, Eskimo, and Aleut populations, and in Housing Subject Reports, HC80-3.

Limitations of the Data

The statistics for some identified reservations and Alaska Native villages in this report differ from those published in *General Population Characteristics*, PC80-1-B, and *General Housing Characteristics*, HC80-1-A, because this report includes corrections made after final 1980 census tabulations were completed. Such corrections also have been made for two counties in the identified historic areas of Oklahoma (excluding urbanized areas). Data for the historic areas, however, have not been previously published in census reports.

Corrections to the 1980 census counts made after the final census tabulations were completed for reservations, the historic areas of Oklahoma (excluding urbanized areas) and Alaska Native villages, are shown in tables L, M, and N. The corrected counts and the uncorrected figures published in table 55 of PC80-1-B are shown in these tables for the total and American Indian or American Indian, Eskimo, and Aleut populations for these American Indian areas and Alaska Native villages. The corrections shown in these

[1]Not in PC80-1-B.
[2]Estimate based on preliminary information from 1980 census Supplementary Questionnaire for American Indians (Reservations and Historic Areas of Oklahoma).
[3]Corrected 1980 census count.

tables include all revisions as of December 1983.

In addition to the corrections shown in tables L, M, and N, estimates are provided in table O for eight reservations and the Te-Moak Tribal Trust Lands where data were affected by nonsampling errors. An evaluation of the 1980 census data showed that the 100-percent counts of the total and/or American Indian populations were affected by nonsampling errors in some areas (i.e., human and mechanical error). Nonsampling errors may be introduced during each of the many extensive and complex operations used to collect and process census data. The Bureau of the Census attempted to control the sources of such errors during the collection and processing operations. For example, the various field and computer operations undergo a number of quality control checks to ensure their accurate application. Work of enumerators was carefully monitored, field staff were prepared for their tasks by using standardized training packages which included instructions in using census materials, etc. The successfulness of such procedures, however, was contingent upon how well the instructions were actually carried out during the census.

Table O presents American Indian estimates for Blackfeet Reservation, Santa Clara Pueblo, Santa Ynez Reservation, and Te-Moak Tribal Trust Lands based on related information from the 1980 census, the BIA, State governments, and tribes.

Table O also shows estimates for the total and American Indian populations for 3 reservations—Coushatta, Pine Creek, and Summit Lake—which are based on preliminary information from the Supplementary Questionnaire for American Indians (Reservations and Historic Areas of Oklahoma).[1] Although procedures were to enumerate specified American Indian areas on both the regular census form and supplementary questionnaire, available information indicates that the American Indian population for

[1]The 1980 Census Supplementary Questionnaire for American Indians (Reservations and Historic Areas of Oklahoma) was administered on Federal and State reservations and the historic areas of Oklahoma (excluding urbanized areas). The universe includes those households in the specified areas that received the regular *short* census form and had at least one American Indian, Eskimo, or Aleut member.

BEST COPY AVAILABLE

Miccosukee Reservation and Tigua Reservation was more completely enumerated on the supplementary questionnaire.

In addition to corrections and estimates, processing and/or enumeration problems may have affected 100-percent data for four reservations: Mattaponi, Onondaga, Pamunkey, and Tuscarora. Although the total and American Indian population figures are reasonable, data for such characteristics as age and marital status may have been affected.

As a result of the corrections and estimates, the counts of American Indians for some geographic areas (e.g., States and counties) differ from those published in PC80-1-B and HC80-1-A and other 1980 census reports.

Table 1. Total and American Indian, Eskimo, and Aleut Persons by State: 1980

(Corrections to the 1980 census counts which were made after the final census tabulations were completed are reflected in the data for "American Indian" but not in the data for "All races," "Eskimo," or "Aleut." Data include estimates for a few American Indian areas. For estimates and corrections, see Limitations of the Data. For meaning of symbols, see Introduction. For definition of terms, see Definitions and Explanations.)

Table 3. Total and American Indian Persons and Housing Unit Counts for Identified Reservations and Identified Tribal Trust Lands: 1980

Corrections to the 1980 census counts of the total and American Indian populations which were made after the final census tabulations were completed are reflected in the data for reservations. For meanings of symbols, see Introduction. For definition of terms and corrections, see Definitions and Explanations and Limitations of the Data, respectively.

Reservations Tribal Trust Lands	Persons			Total housing units	Occupied housing units		
						American Indian householder or spouse	
	All races	American Indian	Percent American Indian of all races		Total	Total	American Indian householder
